### Oshawa Second Marsh, Oshawa

Second Marsh is the most significant remnant coastal wetland within the GTA. Designated provincially significant, Second Marsh incorporates a wide variety of habitats on more than 300 acres. Rich in a diversity of wetland dependent flora and fauna, many considered rare, threatened or endangered, Second Marsh is utilized by a great number of waterfowl and other water birds for both spring and fall staging habitat, as well as for productive summer breeding. In addition, Second Marsh currently provides an important outdoor recreation and nature interpretation destination for thousands of visitors annually. A nature interpretation centre is being planned for the future to complement these activities.
