

To create a 740 km trail, you need some great connections.

*Congratulations to all the
partners who created the
Lake Ontario Waterfront
Trail and Greenway.*

When the 740 kilometer, Lake Ontario Waterfront Trail and Greenway is completed in 2005, it will be because governments, business, community groups and the general public acted as partners with a common goal. They connected in order to create a waterfront legacy and bring people to the water's edge. Today, the Trail is enjoyed by bicyclists, hikers, and joggers province-wide. Upon completion, it will be a source of pride to – and will connect – over 6 million people in Ontario.
